Ion Series

direct vent gas fireplaces

modern
versatility

Take modern style to new places with the Ion gas fireplace series. At only 7-inches deep, these square, vertical and horizontal models can install in nearly any room—quicker and easier than other fireplaces. Two front color choices and an ambient backlighting option create a truly unique look in any environment.

Think differently about fire and take modern style to new places. It's all possible with the Ion series.

Features:

- Square, horizontal and vertical models
- Ambient LED backlighting option
- 2 front color options
- Up to 24,000 BTUs

Cover: Ion Horizontal with black Four Square front

Above: Ion Vertical with bronze Four Square front and LED backlighting

Personalize with Upgrades

Fronts

Showcase the fire within by selecting a front. The Four Square front adds sleek style and clean lines to your finished look.

Bronze

Black

Vertical in Bronze

Square in Bronze

Horizontal in Black

LED Backlighting

Multicolored LED backlighting adds impact to modern fires. This option provides six colors to enjoy with or without the flames.

Red

Amber

Lime Green

Cyan

Royal Blue

Light Purple

Black Glass Liner

Multiply the flames and intensify the fire with this standard fade resistant reflective black glass liner.

Ion Square with bronze Four Square front

IntelliFire™ Plus Ignition System

The IntelliFire™ Plus Ignition System (IPI Plus) is an advanced intermittent pilot ignition system with memory settings and a programmable wireless control. IPI Plus constantly monitors ignition, ensures safe functioning and conserves up to \$10/month in energy costs. To learn more, visit heatilator.com.

Direct Vent Technology

Direct Vent fireplaces remove 100% of combustion exhaust and odors outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality. To learn more, visit heatilator.com.

U.S. Efficiencies

Steady State - Since most homeowners use their fireplaces for an extended time while they are in the room, Steady State measures how efficiently your fireplace converts fuel to heat once it is warmed up and running in a "steady state".

AFUE - AFUE rating is more typically used with appliances, like your furnace, that continually cycle on and off to maintain a constant temperature.

Canada Efficiencies

EnerGuide (CSA P.4.1-02) - EnerGuide is a rating used in Canada to measure annual fireplace efficiency.

*Requires purchase of optional in-wall installation kit

Rating	Ion Vertical	Ion Square	Ion Horizontal
Steady State	63.7% (NG)	63% (NG)	68.4% (NG)
AFUE	61.8% (NG)	62.7% (NG)	66.3% (NG)

Rating	Ion Vertical	Ion Square	Ion Horizontal
CSA P.4.1-02	60.2% (NG)	64.5% (NG)	67.5% (NG)

Clearances

Note: The ION-V7 is the only ION appliance that can be vented with a 45 degree elbow directly off the back positioned horizontally.

Framing

MODEL	A	B	C
Ion Vertical	20-1/8" [511]	43-1/8" [1095]	4" min.
Ion Square	29-3/8" [746]	40-1/2" [1029]	4" min.
Ion Horizontal	39-3/8" [1000]	39 [991]	4" min.

The rough framing dimensions shown represent the distance from stud to stud only and do not take into consideration the addition of drywall. Please refer to installation instructions for complete specifications and drawings when installing this product. Go to heatilator.com to download.
